PROFESSIONAL SUMMARY

Software Engineer focused on Front-End with 3 years of experience in a financial corporate environment, working on the evolution of large-scale internal portals and the resolution of critical production issues. Specialized in React and TypeScript, with strong expertise in hooks, custom hooks, state management, REST API consumption with asynchronous programming, Clean Code, and unit and integration testing (Jest and Cypress). Took technical ownership of a critical accounting portal and led a task force that increased test coverage from less than 60% to 90% in CI/CD pipelines. Combines a full-stack perspective with the ability to investigate and resolve bugs across front-end, BFF, and back-end.

PROFESSIONAL EXPERIENCE

GETNET — Software Engineer

05/2023 – 01/2026

- Assumiu a responsabilidade técnica e a continuidade do portal interno contábil após a saída do ensuring system evolution and stability without interrupting operations.
- Desenvolveu filtros, listagens e formulários responsivos em React com TypeScript, utilizando hooks and custom hooks for state management and reusable logic, eliminating 100% of manual API Client queries performed by end users.
- Implementou consumo de APIs REST com programação assíncrona para integração com back-end and BFF integration, ensuring consistency and error handling across the accounting portal's data flows.
- Sustentou e evoluiu um ecossistema de 11 microsserviços críticos para o fechamento contábil managing the consumption, persistence, and processing of more than 50,000 financial records monthly using Azure Service Bus and RabbitMQ.
- Liderou, em dupla, força-tarefa emergencial para elevar a cobertura de testes de unidade e for a critical microservice from less than 60% to 90%, using Jest and Cypress and meeting Azure DevOps CI/CD pipeline requirements.
- Investigou e solucionou bugs críticos de produção inspecionando simultaneamente as camadas de back-end, BFF, and front-end layers, reducing downtime and resolving complex message reprocessing flows.
- Articulou alinhamentos cross-functional com múltiplos times técnicos e de infraestrutura para release corporate access and URLs in highly regulated banking environments.
- Conduziu mentoria técnica de profissionais em início de carreira (Jovens Aprendizes), sharing Clean Code best practices, development workflows, and Node.js fundamentals.

PROJECTS

LumiCine — Next.js · React · TypeScript · Tailwind CSS · Figma

- Desenvolveu aplicação web de cinema de ponta a ponta, implementando toda a identidade visual e high-fidelity prototyping in Figma before coding.
- Construiu a interface com Next.js, React, TypeScript e Tailwind CSS, consumindo dados de API open-source entertainment API while ensuring responsiveness and visual consistency.
- Estruturou a arquitetura de componentes para máxima reutilização e manutenibilidade da application.

Linkr — React · Node.js · PostgreSQL · Full Stack

- Atuou na concepção completa do projeto do zero — desde o desenho da arquitetura técnica e relational database modeling to full-stack feature development.
- Desenvolveu em time de 4 pessoas com metodologia ágil, integrando front-end ao back-end com server-side logic and data persistence in PostgreSQL.

EDUCATION

Bachelor's Degree in Software Engineering | Universidade do Norte do Paraná

01/2023 – 06/2026

CERTIFICATIONS

Full Stack Development Bootcamp | Driven Education

2022 | 1.200 horas

MongoDB — Schema Design Patterns

TECHNICAL SKILLS

- **Front-end e UI/UX:** React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, Figma
- **Back-end e Arquitetura:** Node.js, Express, BFF (Backend-For-Frontend), APIs REST, Microservices, Docker
- **Mensageria e Dados:** Azure Service Bus, RabbitMQ, PostgreSQL, MongoDB
- **Qualidade e Ferramentas:** Jest, Cypress, Azure DevOps (Pipelines CI/CD), Git, GitHub, Clean Code, Scrum

LANGUAGES

- Inglês — Avançado/Profissional (B2)
- Espanhol — Básico (A1)
